***Response to Amendment***

1. This office action is in response to applicant's amendment received on 8/26/05. Claims 1, 4, 10, and 13 have been amended. Claims 28 – 30 have been added. Claims 1 – 30 are pending on this application. Claims 1, 10, and 20 are independent claims.

***Allowable Subject Matter***

2. Claims 1 - 30 are allowed.
3. The following is an examiner's statement of reasons for allowance:

**With respect to claim 1**, in addition to other elements in the respective claims, the prior art of record fails to teach or suggest "a second electrically connected to at least one of said ferromagnetic elements to sense electrons tunneling across said barrier layer, said second electrically conductive line being connected to a plurality of transistors in parallel, the plurality of transistors being configured to have a same state during a read operation".

**With respect to claim 10**, in addition to other elements in the respective claims, the prior art of record fails to teach or suggest "a third electrically conductive line that is electrically connected to said one cell to read said states, said third electrically conductive line being connected to a plurality of transistors in parallel, the plurality of transistors being configured to have a same state during a read operation".

**With respect to claim 20**, in addition to other elements in the respective claims, the prior art of record fails to teach or suggest "an electrically conductive read line that is electrically conductive read line that is electrically connected to said one cell and

connected to a plurality of transistors in parallel, to read said state of said one cell when said transistors are all turned on”.

Dependent claims 2 – 9, 11– 19, and 21 – 30 are allowed based on independent claims above.

4. The prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. Zhu and Gider et al., taken individually or in combination, do not teach the claimed invention of the plurality of transistors being configured to have a same state during a read operation, in combination with other limitations.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

#### ***Prior art***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
